RESPONSE TO FINAL OFFICE ACTION

This is in response to the Final Office Action dated July 25, 2002. Please enter the following amendment and remarks.

IN THE CLAIMS

Please enter the following clean version of amended claim 1. A marked-up version is provided at the end of this response.

*Handwritten "1." and "B" next to the claim text.*  
A multi stage process for reducing the level of sulfur and in a distillate feedstock having a sulfur content greater than about 3,000 wppm, which process consists essentially of:

- a) reacting said feedstream in a first hydrodesulfurization stage in the presence of a hydrogen-containing treat gas, a portion of which is cascaded from the second hydrodesulfurization stage of d) below, said first hydrotreating stage containing one or
